Profile

I offer a "no-nonsense" graphic design service that is based on quality of final product. You won't find any flowery marketing hype in my repertoire, just honest, technical and professional expertise! - and if there is something I can't do, I will let you know!

Download this page as pdf.

Since moving to Cairns in 1997, I am beginning to establish myself as a freelance graphic artist. I have a growing client base for whom I carry out regular work, together with new clients who come to me through recommendation from others. I can offer a high standard of work in all areas of design, for both printed, and website mediums, based on current technology, and for what I feel is a very competitive rate.

Minimal office overheads ensures I can offer clients a better rate and service than larger 'agency' design outlets. My previous experience in book publishing has given me a solid foundation in the processes involved in conceptualising, styling and producing books, together with the ability to draw detailed roughs for commissioning of artists, and producing artwork myself either conventionally or digitally.

My training is to degree level in Graphic Information Design from the University of Westminster in London, providing me with a focussed attitude and mind towards the effective portrayal of information content in not only print but all media.
